

THE IMPACT OF GIVING

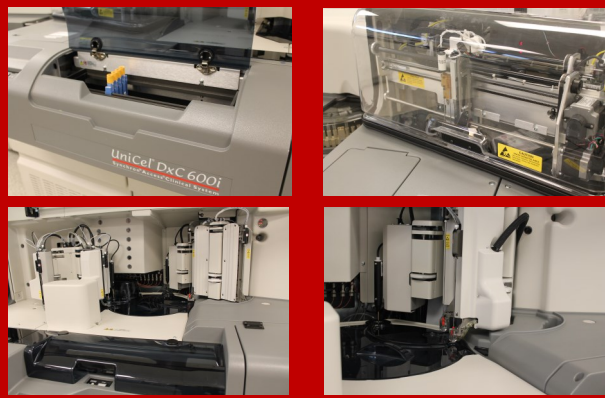

SAULT AREA HOSPITAL
FOUNDATION
IMPACT REPORT

SAHF

JANUARY
2015

Essential to patient care, the new chemistry analyzers are currently analyzing blood samples here at SAH! These vital pieces of equipment were part of a year long campaign starting in April 2013 which saw thousands of great donors from the Algoma District working together to raise the necessary funds to equip the lab with these new instruments. The majority of treatment options which physicians make, come from the results in the lab. Next time you think about bloodwork, know your gifts made this purchase possible!

Over
\$589,050

has been disbursed from
April 1st - Nov. 1st, 2014 for
medical equipment at
Sault Area Hospital.

TOGETHER WE MAKE A DIFFERENCE!

Look forward to an amazing 2015!

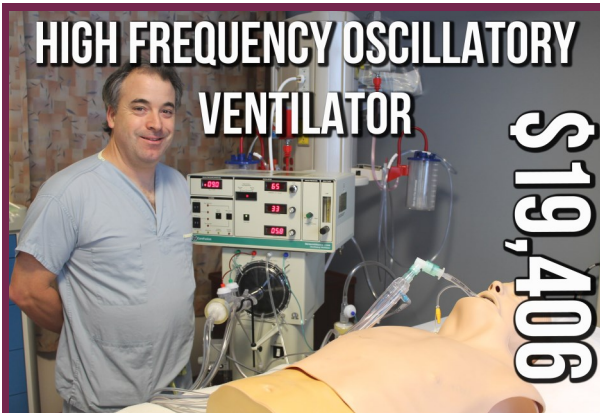

Full of care, compassion and Heart...

2014 has been an exciting year for the Sault Area Hospital Foundation. The gifts we have received from the great people, organizations and businesses throughout this year have been used to purchase the medical equipment that this community needs!

As you may already know, 2015 is going to be an important year for cardiac services at the Sault Area Hospital and this community!

On behalf of the Sault Area Hospital Foundation Board of Directors and Staff...

Thank You!

The Oscillator enables high-performance and high frequency oscillatory ventilation for patients. It performs precise, rapid breaths to help protect the lungs from stretching and stabilize the lung tissue. This piece helps bring the lungs back to normal in an intensive care setting. Thank you to a very generous donor for making the purchase of this life-saving device possible!
